

AJEESH KUMAR B S

Email : ajeeshkumarbs168@gmail.com | Phone : +91 9567106498 | Location : Trivandrum, Kerala

LinkedIn : [linkedin.com/in/ajeesh-kumar-b-s-60978631a](https://www.linkedin.com/in/ajeesh-kumar-b-s-60978631a) | GitHub : github.com/Ajeeshkumar73

OBJECTIVE

Motivated MCA graduate with strong programming fundamentals and web technologies, seeking a Software Developer position to design, develop, and maintain scalable applications. Passionate about problem-solving, learning new technologies, and contributing to high-quality software development in a collaborative environment..

EDUCATION

Master of Computer Application — CGPA: 8.37

Lourdes Matha College of Science and Technology, Trivandrum (2024–2026)

Bachelor of Science in Computer Science — CGPA: 7.18

Kerala University (2021–2024)

SKILLS

Programming Lang	: Python, PHP, C, JavaScript
Frontend	: React.js, HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap
Backend	: Django, Flask, REST APIs, MVC Architecture
Database	: MySQL, SQLite, MongoDB
Emerging Technologies	: Machine Learning, DeepLearning, Artificial Intelligence
Tools	: Git, GitHub, VS Code, Jupyter Notebook, Excel

PROJECTS

PERSONAL PORTFOLIO WEBSITE | live demo: <https://ajeeshkumar.vercel.app/>

Responsive Full-Stack Portfolio Website

Tech Stack: React.js, Django, Django REST Framework, SQLite, HTML5, CSS3, Tailwind CSS, JavaScript, Vercel, Render

- Developed a responsive full-stack portfolio website with a React.js frontend, Django REST Framework backend, and SQLite database to showcase projects, technical skills, certifications, and achievements.
- Designed and integrated RESTful APIs to dynamically manage portfolio content, including projects, contact information, and resume downloads, while implementing a modern and user-friendly interface.
- Deployed the React frontend on Vercel and the Django backend on Render, utilizing Git for version control and optimizing the application for performance, responsiveness, and scalability.

LEARNLOOP | <https://github.com/Ajeeshkumar73/LearnLoop>
AI-Powered Career Guidance & Skill Development Platform

Tech Stack: HTML5, CSS3, Javascript, Tailwind CSS, Django, MongoDB, Model- LLaMA 3.3 70B, NLP

- Developed an AI-powered career guidance platform that provides personalized career recommendations, skill-gap analysis, and customized learning roadmaps.
- Designed and implemented modules for resume generation, job description analysis, and an AI mentor chatbot using REST APIs and NLP techniques.
- Built real-time community and collaboration features while following modular coding practices and database optimization techniques.
- Utilized Git and GitHub for version control and followed object-oriented and modular programming practices to develop scalable applications.

WELLNESS WAVE | https://github.com/Ajeeshkumar73/wellness_wave_main
Early Lifestyle Disease Prediction and Prevention System

Tech Stack: HTML5, CSS3, Javascript, Tailwind CSS, Flask, MongoDB, TabNet (Deep learning), Model- qwen/qwen3 32B

- Developed an intelligent healthcare application that predicts lifestyle disease risks using deep learning models and user health data.
- Implemented personalized health recommendations, doctor appointment booking, and chatbot functionalities for preventive healthcare support.
- Designed responsive interfaces and integrated machine learning services while ensuring application reliability through testing and debugging.
- Utilized Git and GitHub for version control and followed object-oriented and modular programming practices to develop scalable applications.

SCORE TRACKER | <https://github.com/Ajeeshkumar73/score-tracker>
Employee Productivity Monitoring and Smart Task Recommendation System

Tech Stack: HTML5, CSS3, Javascript, Tailwind CSS, Flask, MongoDB, RandomForest

- Developed a workforce management platform that analyzes employee performance and generates real-time productivity insights.
- Built a task recommendation engine that assigns tasks based on employee skills, workload, and historical performance data.
- Implemented attendance, leave management, and analytical dashboards with optimized database operations and real-time communication features.
- Utilized Git and GitHub for version control and followed object-oriented and modular programming practices to develop scalable applications.

FARMIE | <https://github.com/Ajeeshkumar73/farmie> Web-Based Agriculture Management System

Tech Stack: HTML5, CSS3, Javascript, Tailwind CSS, Flask, MongoDB, RandomForest

- Developed an agriculture management platform that provides crop cultivation guidance and AI-based disease detection with preventive recommendations.
- Designed and implemented an online marketplace enabling farmers to manage and sell agricultural products directly through the platform.
- Built responsive user interfaces and backend services while applying software engineering principles, testing, and debugging techniques.
- Utilized Git and GitHub for version control and followed object-oriented and modular programming practices to develop scalable applications.

ONLINE CRIME REPORTING | Web-Based Crime Reporting and Analysis System

Tech Stack: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, Data Mining

- Developed a web-based crime reporting system that enables citizens to submit complaints and report incidents online, eliminating the need for physical visits to police stations.
- Designed and implemented secure complaint management modules using PHP and MySQL for efficient storage, tracking, and administration of crime reports.
- Integrated data mining and clustering techniques to analyze crime data, identify patterns and trends, and support data-driven decision-making for law enforcement agencies.

CERTIFICATIONS

- Software Programmer - Python — IT-ITeS SSC NASSCOM, 2024
- Data Analytics — IT-ITeS SSC NASSCOM, 2025
- Cloud Computing — NPTEL, 2025

ACHIEVEMENTS & AWARDS

- **1st Place, Ideathon 2025** — Lourdes Matha College of Science and Technology. Led a team of four to build and pitch an innovative technical solution under competition conditions.
- **2nd Place, Hackathon 2025** — Web development competition conducted by IEDC.
- **Led Web Design Competition, Department Fest 2025** — Organized and managed the web design track for the annual college technical festival.

PROFESSIONAL STRENGTHS

- Strong analytical and problem-solving abilities.
- Quick learner with the ability to adapt to new technologies and frameworks.
- Good understanding of software development principles and object-oriented programming.

HOBBIES

- Sketching and Drawings
- Listening to Music and Watching Movies .
