SUMMARY

Detail-oriented MCA graduate with hands-on knowledge of Python, Django, Flask, React.js, JavaScript, HTML, CSS, REST APIs, SQL, and MongoDB. Experienced in developing full-stack web applications and integrating AI/ML, NLP, and LLM technologies into real-world projects. Strong understanding of SDLC, authentication, testing, and debugging, with proven problem-solving and teamwork skills. Eager to contribute technical skills and grow in a professional software development environment.

EDUCATION

- Master of Computer Application** | CGPA: 8.37
LMCST, APJ Abdul Kalam Technological University, Trivandrum | 2024–2026
- Bachelor of Science in Computer Science** | CGPA: 7.18
Kerala University | 2021–2024

TECHNICAL SKILLS:

- Frontend:** HTML, React.js, CSS, JavaScript, Tailwind CSS, Bootstrap, Responsive Web Design
- Backend:** Django, Flask, REST APIs
- Databases:** MySQL, MongoDB, SQLite
- Languages:** Python, C
- Tools & Technologies:** Git, GitHub, Excel, Power BI
- Cloud & Deployment:** Vercel, Render, AWS (Basic)
- Concepts:** Full-Stack Development, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Authentication & Authorization, Testing & Debugging
- AI & Machine Learning:** Machine Learning, LLM Integration, NLP

PROJECTS

LEARN LOOP- AI-Powered Career Guidance & Skill Development Platform

GitHub: [github.com/Ajeeshkumar73/LearnLoop](#)

- Developed an AI-powered career guidance platform providing personalized career recommendations, skill-gap analysis, customized learning roadmaps, and AI-powered resume generation.
- Built an AI mentor chatbot and job description analyzer using LLM integration and REST APIs to deliver personalized career guidance.
- Implemented a community platform enabling users to create posts, discover career-related content, and connect with professionals sharing similar career interests.

WELLNESS WAVE - Early Lifestyle Disease Prediction and Prevention System

GitHub: [github.com/Ajeeshkumar73/wellness_wave_main](#)

- Developed an AI-powered healthcare application using PyTorch TabNet deep learning models to predict lifestyle disease risks from user health metrics and lifestyle data, achieving over 95% prediction accuracy on the evaluation dataset.
- Implemented personalized health recommendations for low- and moderate-risk users, automated doctor consultation and appointment booking for high-risk users, and integrated an LLM-powered chatbot for preventive healthcare support.
- Developed features for exploring doctors' blogs, tracking health records, and providing personalized preventive healthcare insights.

CERTIFICATIONS

- Software Programmer - Python** | IT-ITeS Sector Skills Council (SSC) NASSCOM, 2024
- Data Analytics with Microsoft Power BI** | IT-ITeS Sector Skills Council (SSC) NASSCOM, 2025

ACHIEVEMENTS

- 1st Place, EVOX 2025 Ideathon:** Collaborated in a 4-member team to develop a technology solution for a social challenge.
- 2nd Place, IEDC Hackathon 2025:** Developed a full-stack web application through rapid prototyping and problem-solving.
